# WISE INVESTMENT LIMITED - ETHICAL BALANCED Pershing

### MONTHLY FACTSHEET

all data as at 30th September 2024

#### PORTFOLIO OBJECTIVES AND STRATEGY

The Wise Ethical Balanced Model Portfolio is designed for clients who are looking for a total return in line with the MSCI PIMFA Balanced index over a 5 to 10-year period. We aim to achieve this by exclusively investing in a focussed list of ethical and sustainability-oriented funds (unit trusts, investment trusts and OEICs). These funds will have specific objectives of providing capital to businesses whose operations and activities either meet specific ethical standards or are engaged in improving the long-term sustainability of the earth's resources. The portfolio will have diversification across geography, asset class and investment style. The funds invest in real assets, such as company shares (listed both in the UK and overseas), property, fixed interest and cash. The Portfolio is managed so that 50%-80% is invested in 'medium' risk assets, such as shares and property, 20%-50% is to be held in assets defined as 'moderate', 'low' or 'minimal' risk, which are mainly comprised of fixed interest (UK government and higher quality company debt) and cash, any remaining balance up to 10% can be held in higher risk assets such as shares in specific countries and industries. We consider the portfolio to be suitable for those willing to adopt a balanced risk profile.

# PERFORMANCE SINCE LAUNCH (using month-end data)

# **CUMULATIVE PERFORMANCE**

	1m	3m	6m	1yr	3yr	Launch
Wise Ethical Balanced Portfolio (P)	0.1%	1.3%	2.7%	15.7%	5.9%	26.2%

All data used on this factsheet is supplied by Financial Express. Rounding may result in charts and tables not adding up to 100% in displayed data. Performance is based on total returns on a bid-to-bid basis, net of UK dividend tax credits and is calculated referencing a model portfolio. Actual portfolio statistics may differ because of investment performance, cash movements, transaction costs and the timing of sales and purchases within the portfolio. Quoted performance does not include fees levied by Wise Investments Ltd or any fees from custodial services. Service fees will apply. Past performance is not a reliable indicator of future results. This document should not be construed as an investment recommendation.

- 1 The Historic Vield is the weighted average yield of the model based on the model's current constituents
- 2 Volatility is the annualised monthly volatility of the model portfolio to the most recent month end over a 3 year period or since launch if this period is less than 3 years
- 3 The Model OCF calculates the annual charges levied by the underlying fund holdings according to the model portfolio weights
- 4 The Service Fee incorporates the model OCF, the standard non-tiered annual fees levied by Wise Investments Limited and custodian fees, of which this is the highest possible fee. Further details of these charges are disclosed to clients investing in the model portfolios.

#### MONTHLY COMMENTARY

September was a mixed month for investors. In equity markets the standout is China which had a massive rally of the back of the announcement of stimulus measures from their central bank aimed at steadying a faltering post-covid economy dragged down by an ailing property market.

With China as the largest component of the emerging-markets basket - the EM index was up 4.5% while other markets were more subdued. The US market, and the world market overall (of which the US is over 70%) was fairly buoyant, but ended flat in Sterling terms due to a sizeable strengthening of GBP vs USD (up 2%). Europe was down 1.6% in sterling terms, again largely due to GBP strength, this time up 1.2% vs the Euro. The origin of this strong GBP is likely the recent BOE decision to maintain interest rates at 5% while others, notably the US Fed, have begun seemingly more rapid cuts, with the Fed cutting a sizable 0.5% in one go.

Underperforming markets included Japan, which is still shaking off the volatility in August that capped its meteoric rise earlier in the year, down 2.6% over the month. The UK also saw a pull back of 1.5% where investor confidence is being shaken by increasingly worrying noises coming from the new labour government and potential tax rises in the upcoming Autumn Statement. Europe also lagged, down 1.6% in sterling terms, mostly due to a weakening euro vs GBP.

In Fixed income things were characteristically steady with Corporate bonds up 0.4% and Government bonds more or less flat, up 0.1%. High yield bonds came in with a solid 1% return. Elsewhere property had a very strong month with the liquid real estate sector up 1.2% and direct property up 0.9%.

Looking forward, we remain cautious in the shorter term on global equities, especially given recent RISK ALLOCATION volatility particularly in the US and Japanese markets and preferring the valuations and back drop of other markets such as the UK equity market. Upcoming rate cuts, however, should provide broad support.

In fixed income, we now look to be headed into the cutting part of the cycle where the question becomes, how quickly and deeply will central banks cut. We believe that cuts will not perhaps go as quick and far as markets seem to be predicting and should see a normalising yield curve (which is currently rater flat) thus the ideal spot is likely to be to position in the central "belly" of the curve as appropriate to portfolio time horizons and risk tolerance.

The Ethical Balanced model returned 0.11%, slightly head of the -0.04% return for the benchmark (PIMFA Balanced)

The notable underperforming position was the small holding in AB Internation Healthcare portfolio which returned -5.7% while the notable outperformer was Schroder Global Cities Real Estate fund returning +1.9%.

In terms of portfolio moves, there were a few changes in the fixed income portion of the portfolio. We exited the positions in the Edentree R&S Short Dated Bond and the Rathbone Ethical Bond funds in order to enter a position in the TwentyFour ABS opportunities fund, taking advantage of the high rates on offer in this stable asset class. We also put some of the capital into the TwentyFour sustainable global corporate bond fund in order to slightly increase the duration profile of the portfolio as rates start to come down in the later part of the current credit cycle.

Strategically we continue favour a strategy of strong core global equity exposure via the low fee passive Vanguard ESG developed world all cap equity index fund as well as the Fundsmith sustainable equity fund. This is more volatile exposure is moderated by high quality and shorter dated bonds in the fixed income portion of the portfolio.

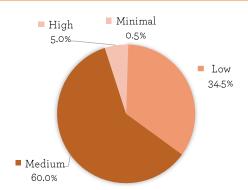

Tactically, we maintain our position in the Aegon ethical equity fund to capture the substantial discount we see in the UK market. We also maintain a 5% position in the AB international healthcare fund to take advantage of the attractive valuations in the healthcare sector – a sector that also has enjoyed strong longterm returns due to the high quality nature of many healthcare businesses and the steady secular growth trends they are exposed to (e,g aging populations).

We also have a modest 5% position in Schroder Global Cities Real Estate fund as we continue to see value in this down beaten asset class as shown by the depressed prices in commercial properties and large net asset value discounts in listed real estate trusts.

The Ethical Balanced model is now ahead of its benchmark on a 1yr basis, returning 15.7% vs 14.3% for MSCI PIMFA Balanced, but remains behind the benchmark over a 3yr rolling period.

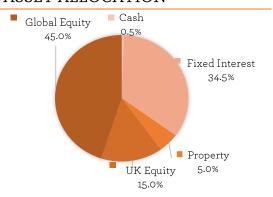

### HOLDINGS

Name		OCF
